SUMMARY

Dedicated, goal-oriented cybersecurity enthusiast with hands-on training in IT security analysis from Cybershujaa and a solid academic foundation in Information Security and Forensics from KCA University. Known for professionalism, a customer-centric mindset, and a passion for strengthening organizational security through impactful cybersecurity initiatives — all while ensuring compliance with regulatory standards and security policies.

EDUCATION

KCA University, Nairobi, Kenya - Bachelor of Science, Information Security and Forensics. **Jul 2025**
Acquired comprehensive knowledge in information security, forensics, and cybersecurity practices, emphasizing the protection of digital assets and investigation of cyber incidents.

KCA University, Nairobi, Kenya - Diploma, Business Information and Technology **Sep 2019 — Nov 2021**
Gained a solid foundation in business information systems and technology management, focusing on the integration of IT solutions in a business environment.

CERTIFICATIONS

- 1. Cisco Ethical Hacker, Cisco** **Apr 2026**
- 2. Data Science, ALX kenya** **Aug 2024**
- 3. Security Analyst, Cybershujaa** **Aug 2024**
- 4. Certificate of Participation in Data Protection, Strathmore University's Centre for Intellectual Property and Information Technology Law (CIPIT)** **Sep 2019**

SKILLS

- Technical Skills** : Linux, Encryption, security awareness, Threat Detection, vulnerability assessments, Penetration Testing, cyber incident response , Vulnerability Management, Data Security, Continuous Monitoring, Social Engineering (Phishing Simulations, Physical Security Assessments), Routine Maintenance
- Soft skills** : Peer Leadership, Communication Skills, Analytic Problem Solving, collaboration skills and team player, Customer Centric, Report Writing and Documentation, Goal oriented and passionate.
- Tools** : Metasploit, Burp Suite, Nmap, Nessus, OpenVAS, Wireshark, Splunk, Remote Desktop Protocol (RDP), Python (for scripting and automation), Wazuh siem tool

EXPERIENCE

Attachment, KIPPRA, Nairobi, Kenya **Mar 2025 — May 2025**
I gained hands-on experience supporting technical operations and contributing to IT projects involving system development and maintenance, while efficiently managing user issues, overseeing incident management across departments, and ensuring compliance with organizational policies, internal controls, and data protection standards.

Academic intern, Kenyatta University, nairobi, Kenya **May 2024 — Jul 2024**
I gained hands-on experience by assisting with technical support tasks and projects applying my theoretical knowledge to practical scenarios. I contributed to development activities while ensuring compliance with regulatory standards and policies. Additionally, I managed the institution's ticketing system, effectively handling issues and overseeing incident management across various departments.

PROJECTS

- **Professional Development:**

1. Python Programming and Scripting: Developing Python scripts for automation of security tasks, vulnerability scanning, network traffic analysis, and incident response workflows to improve efficiency and effectiveness in cybersecurity operations

2. Network Sniffing and Traffic Analysis: Experience with capturing and analyzing network traffic using network sniffers.

3. Exploitation Frameworks: Including MITRE ATT&CK® and OWASP guidelines, for identifying vulnerabilities and enhancing offensive security capabilities in alignment with NIST standards.

4. Incident Response and Forensic Disk Analysis: Working on responding to incidents and conducting forensic disk analysis.

Continued Learning & Awareness: Stay current with cybersecurity trends by attending webinars, workshops, and conferences. Actively follow trusted sources like Krebs on Security, Hacker News, and Dark Reading. Track vulnerabilities through CVE and Exploit Database and participate in communities on Reddit and Black Hills Information Security webcasts.
